DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4-9, 11-19, 22-27, 29-37, 40-45 and 47-54 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art the examiner has been able to locate are US Patent Number 7,082,411 to Johnson et al., US Patent Number 5,852,811 to Atkins, US Patent Application Number US2004/0039688 to Sulkowski et al. and US Patent Number 5,963,939 to McCann et al.

Johnson discloses retrieving individual asset data from a database based on a given criteria, performing an NPV calculation and then grouping and using the valuations in a sealed bid auction. Atkins discloses a personal financial program incorporating means of implementing, coordinating, supervising, planning, analyzing and reporting upon investments in an array of asset accounts and liability accounts within a client account. Sulkowski discloses how its LTV framework estimates the future value of credit accounts. McCann discloses data base objects that can be used independently and in parallel, wherein one set of database objects is used to store data, another set of database objects obtain solutions as well as installation and implementation instructions, and still another set of database objects examines the data stored in the first set of database objects and asks the user questions as necessary to fill in any necessary but missing data.

While Johnson, Atkins, Sulkowski and McCann are similar to the instant application in many respects, there are clear patentable distinctions. Unlike the prior

art, the present invention teaches a selector function that uses selection criteria specified by rules to select accounts, forecast amounts, and attrition and propensity rates from a database used to perform Future Value calculations to determine present value of an expected profitability of additional products that may be purchased by matching attrition rates to the selected accounts and matching results of propensity rules to the same accounts used to obtain attrition rates and net change rates to prove a Future Value amount.

3. The following is a formal statement of reasons for allowance:

Claim 1 is allowed because the best prior art of record alone or in combination, neither discloses nor fairly suggests the limitations: A method of performing financial processing, comprising:

(a) selecting, in one or more computers, accounts, amounts and rates from account data stored in a database using selection criteria specified by one or more rules; and

(b) performing, in one or more computers, one or more Future Value (FV) calculations on the selected accounts by applying one or more FV propensity rules to the selected accounts and applying one or more FV attrition rules to results of the FV propensity rules using the selected amounts and rates, wherein the FV calculations determine a possible future profitability value of products that may be purchased in the future;

(c) wherein applying the FV attrition rules comprises matching the FV attrition rule to the selected accounts, matching the results of the FV propensity rule to the matched accounts, obtaining an attrition rate for the matched accounts, calculating an effective attrition rate for each of one or more forecast periods from the attrition rate and a net change rate defined in the FV attrition rule for each forecast period, performing the FV attrition rule to calculate an FV expected value from the effective attrition rate and a

propensity rule amount defined in the FV attrition rule, and storing the FV amount in the database; and

(d) wherein the FV attrition rule is selected from a plurality of methods comprising Constant (no compounding), Constant (with compounding), Additive (no compounding), Additive (with compounding), Manual (no compounding), Manual (with compounding), Constant and Negative Compounding methods.

Claims 4-9, 11-18 are also allowable for the same reasons discussed above by virtue of their dependence on allowed claim 1.

Claim 19 is allowed because the best prior art of record alone or in combination, neither discloses nor fairly suggests the limitations: A system for performing financial processing, comprising:

one or more computers;

logic, performed by the one or more computers, for:

(a) selecting accounts, amounts and rates from account data stored in a database using selection criteria specified by one or more rules; and

(b) performing one or more Future Value (FV) calculations on the selected accounts by applying one or more FV propensity rules to the selected accounts and applying one or more FV attrition rules to results of the FV propensity rules using the selected amounts and rates, wherein the FV calculations determine a possible future profitability value of products that may be purchased in the future;

(c) wherein applying the FV attrition rules comprises logic for matching the FV attrition rule to the selected accounts, for matching the results of the FV propensity rule to the matched accounts, for obtaining an attrition rate for the matched accounts, for calculating an effective attrition rate for each of one or more forecast periods from the attrition rate and a net change rate defined in the FV attrition rule for each forecast period, for performing the FV attrition rule to calculate an FV expected value from the effective attrition rate and a propensity

rule amount defined in the FV attrition rule, and for storing the FV amount in the database; and

(d) wherein the FV attrition rule is selected from a plurality of methods comprising Constant (no compounding), Constant (with compounding), Additive (no compounding), Additive (with compounding), Manual (no compounding), Manual (with compounding), Constant and Negative Compounding methods.

Claims 22-27, and 29-36 are also allowable for the same reasons discussed above by virtue of their dependence on allowed claim 19.

Claim 37 is allowed because the best prior art of record alone or in combination, neither discloses nor fairly suggests the limitations: An article of manufacture comprising a storage device embodying instructions that, when read and executed by one or more computers, result in the one or more computers performing a method for financial processing, comprising:

(a) selecting, in one or more computers, accounts, amounts and rates from account data stored in a database using selection criteria specified by one or more rules; and

(b) performing, in one or more computers, one or more Future Value (FV) calculations on the selected accounts by applying one or more FV propensity rules to the selected accounts and applying one or more FV attrition rules to results of the FV propensity rules using the selected amounts and rates, wherein the FV calculations determine a possible future profitability value of products that may be purchased in the future;

(c) wherein applying the FV attrition rules comprises matching the FV attrition rule to the selected accounts, matching the results of the FV propensity rule to the matched accounts, obtaining an attrition rate for the matched accounts, calculating an effective attrition rate for each of one or more forecast periods from the attrition rate and a net change rate defined in the FV attrition rule for each forecast period, performing the FV attrition rule to calculate an FV expected value from the effective attrition rate and a

propensity rule amount defined in the FV attrition rule, and storing the FV amount in the database; and

(d) wherein the FV attrition rule is selected from a plurality of methods comprising Constant (no compounding), Constant (with compounding), Additive (no compounding), Additive (with compounding), Manual (no compounding), Manual (with compounding), Constant and Negative Compounding methods.

Claims 40-45 and 47-54 are also allowable for the same reasons discussed above by virtue of their dependence on allowed claim 37.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
